

Ziba Hatamian

Junior AI Engineer & Data Scientist

Career Objective

Seeking to join AI and Data Science teams as a Junior AI Engineer / Data Scientist, with a strong interest in advancing skills in Deep Learning and MLOps, and growing into a professional role in applied artificial intelligence.

Profile

Junior AI Engineer with a strong background in data mining and machine learning projects. Proficient in Python and skilled in data analysis, model development, and deployment. Academic background in Genetics (B.Sc.) and Biotechnology (M.Sc.), combining life sciences knowledge with advanced AI techniques. Passionate about applying artificial intelligence to solve real-world problems.

Technical Skills

- **Programming:** Python, SQL (PostgreSQL)
- **Data & ML Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn
- **Modeling Techniques:** Logistic Regression, KNN, Random Forest, Elastic Net, Naive Bayes, SVM, KMeans, DBSCAN
- **Tools & Environments:** Jupyter Notebook, VS Code, Google Colab, Linux/Bash (basic)
- **Model Deployment & MLOps:** Flask, FastAPI, Docker, MLflow
- **Version Control:** Git, GitHub

Experience

Ames Housing Price Prediction

- Built regression models (ElasticNet, Random Forest) for predicting house prices.
- Performed missing value handling, feature engineering, and hyperparameter tuning with GridSearchCV.
- Achieved RMSE = 0.87

Heart Disease Prediction

- Conducted EDA and feature preprocessing.
- Developed a Logistic Regression CV model.
- Evaluated with F1-score = 85%.

Rock Density Prediction

- Applied regression models (SVR, Gradient Boosting, AdaBoost).
- Fine-tuned hyperparameters to minimize prediction error.
- Gradient Boosting & AdaBoost were the best-performing models.

Contact

Phone

09120869471

Email

z.228hatamian@gmail.com

Address

Tehran - East Region

GitHub

https://github.com/zziibbaa/ML_Portfolio.git

Expertise

- Data Analysis & Visualization(EDA, Feature Engineering)
- Machine Learning(Classification, Regression, Clustering)
- Model Deployment (Docker, MLflow, FastAPI, Flask)
- SQL & Data Management(PostgreSQL)

Language

Persian

English(Intermediate)

Gene Expression Classification

- Built KNN with pipeline & GridSearchCV for classifying gene expression data.
- Achieved 94% accuracy
- analyzed class imbalance performance.

Twitter Airline Sentiment Analysis

- Performed EDA and preprocessing on airline customer tweets.
- Compared models: Multinomial Naive Bayes, Logistic Regression, LinearSVC.
- Evaluated classification performance across models.

Customer & Country Segmentation (Bank Marketing, World Factbook)

- Conducted clustering analysis using KMeans with Elbow method & SSD.
- Applied EDA and preprocessing for segmentation.
- Identified customer and country groups for targeted analysis.

Model Deployment Projects

- Developed and deployed ML APIs using Flask & FastAPI.
- Dockerized ML projects for reproducibility and scalability.
- Tracked and managed models with MLflow

Education

M.Sc. in Biotechnology Malek Ashtar University 2014 - 2017

B.Sc. in Genetics Azad University, Tehran Medical Branch 2009 - 2013

Personal Strengths

- Fast learner with strong adaptability to new technologies
- Analytical thinking and problem-solving ability
- Responsible and committed to professional work ethics
- Passionate about continuous learning and self-development

Certifications & Courses

- Python Programming – Dr. Babak Noori-Moghadam, Daneshjooyar
- Machine Learning – Dr. Babak Noori-Moghadam, Daneshjooyar
- Deep Learning – Dr. Babak Noori-Moghadam, Daneshjooyar (in progress)
- PostgreSQL – Udemy
- Docker – Udemy
- MLOps – Udemy (in progress)
